

Compliance is a “SNAP”

Sonicu’s SNAP Calibration program provides an easy & cost effective way to maintain regulatory compliance without the hassle of conventional recalibration

SONICU SOLUTION

A monitoring program is only as good as its sensors’ accuracy. Everything from alarming and protecting to logging and reporting depends on proper data from precise, properly calibrated sensors.

Any enterprise that monitors critical asset or process temperatures should have a recalibration strategy in place to minimize risk, loss, disruption and non-compliance.

Sonicu SNAP Calibration program ensures your temperature sensors are accurate, properly calibrated, and meet regulatory compliance.

With SNAP Calibration enrollment, Sonicu provides new sensors with NIST traceable calibration certificates prior to your current expiration date. Calibration compliance is completed by removing the old sensor and snapping the new sensor into place.

OUR ADVANTAGES

- Removes administrative burden, uncertainty, and worry about required, recurring sensor calibration.
- Completely eliminates downtime associated with conventional recalibration.
- SNAP Calibration is far less expensive than traditional recalibration services.
- Plug-and-play implementation makes Sonicu SNAP Calibration the most efficient recalibration system on the market.
- View, download, or print calibration certificates online in PDF format instantly from any web browser.
- Sonicu adheres to strict quality controls and maintains ISO 17025 compliance.
- SNAP Calibration is available for Sonicu’s full line of digital temperature, air pressure, and humidity sensors.

HOW IT WORKS, Easy as 1...2...3...

- Enroll in Sonicu’s SNAP Calibration program by emailing info@sonicu.com
- Receive notification from Sonicu prior to current certificate expiration that replacement sensors are on the way.
- Once your new calibrated sensors arrive, simply un-snap the old sensors and “SNAP” in the new. Recalibration is now complete!

Sensor Descriptions and Applications*

Glycol-buffered Temperature Sensor
Includes NIST Calibration Certificate

Part No. **Temperature Range**
100234 -40° to +25° C

Digital Temp/Humidity Sensor

Includes NIST Calibration Certificate

Part No. 101212

	Range	Accuracy
Temperature	-10 to +80° C	+/- .4° C
Humidity	0 - 100% RH	+/- 3% RH

Solid-buffered Temperature Sensor
Includes NIST Calibration Certificate

Part No. **Temperature Range**
101234 -40° to +25° C

Air Pressure Differential Sensor

Includes NIST Calibration Certificate

Part No.	Range	Accuracy
101275	+/- 4 inches water column	+/- .25%

Non-buffered Temperature Sensor
Includes NIST Calibration Certificate

Part No. **Temperature Range**
100181 -55° to +125° C

Ultra-low Temperature Sensor
Includes NIST Calibration Certificate

Part No. **Temperature Range**
100260 -100° to 0° C (ultra-low)

Cryogenic Temperature Sensor

Includes NIST Calibration Certificate

Part No.	Temperature Range
100261	-205° to 0° C (cryogenic)

Typical Applications Include

COLD TEMP	HOT TEMP	ULTRA-LOW	CRYOGENIC	TEMP/HUMIDITY	+/- PRESSURE
Medication/Vaccine Tissue / Blood Patient Nutrition Breast Milk Walk-in / Reach-in Refrigeration Food Preparation	Food Warmers Blanket Warmers Fluid Warmers Water Temperature Incubators Industrial Applications	Ultra-low -80° C Storage Tissue / Blood Pharmaceuticals Flash Frozen Foods R&D Samples	Cryogenic -200° C Freezers Tissue / Blood IVR Pharmaceuticals Industrial Applications	Ambient Temp and Humidity Healthcare R&D Labs Pharmacies Warehousing	Differential Room Air Pressure R&D Labs Compounding Pharmacies Construction Clean Rooms Isolation Rooms
