

Monitoring Kits for Scientific or Medical Clean Room Environments

Automatically monitor and log air pressure differential, temperature, and humidity data 24/7.

Applications include scientific labs, medical research facilities, pharmaceutical, data centers, food processing, manufacturing, and more.

Monitoring automatically documents that desired airflow, temperature, and humidity levels are achieved, ensuring regulatory compliance. Sonicu monitoring eliminates manual tasks and streamlines regulatory compliance.

SoniCloud automatically monitors and logs all sensor data.

Why should I choose the Sonicu Platform?

- It's the most effective way to monitor & protect valuable assets.
- It pays for itself by eliminating manual data logging and reporting.
- It documents regulatory compliance.

Turnkey kits deploy quickly, so you can begin monitoring with minimal disruption.

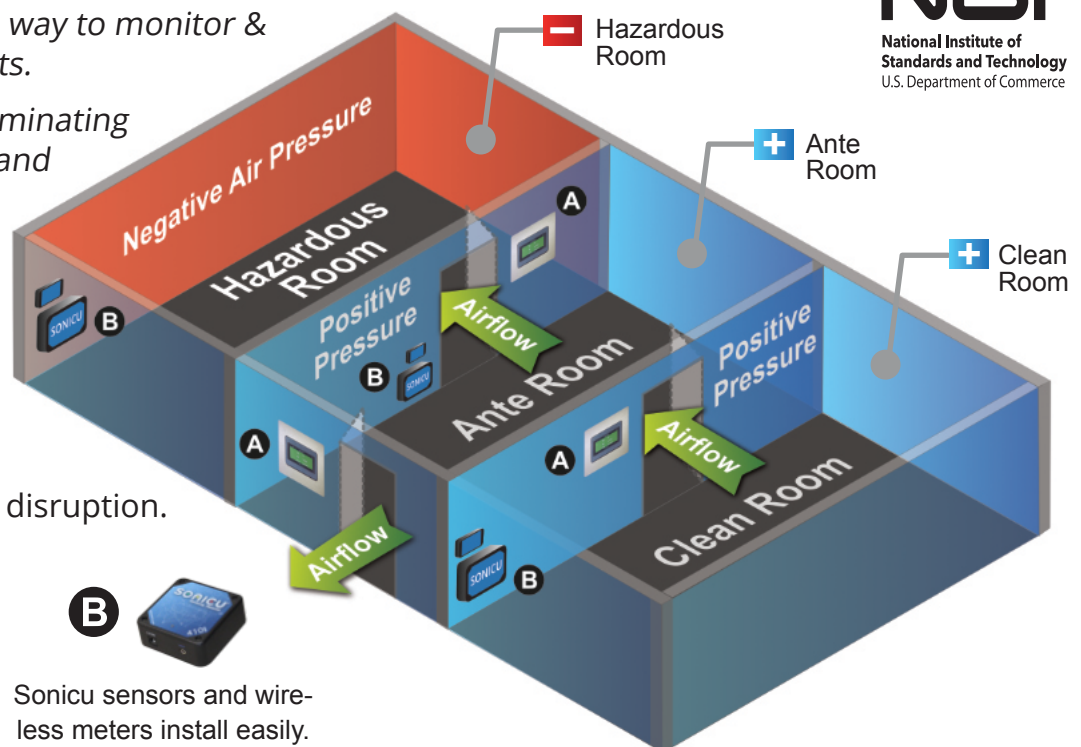

A Color-coded onsite screen displays are flush-mount.

B Sonicu sensors and wireless meters install easily.

Monitoring 3-Rooms Example

Green indicates readings within spec

Red indicates readings out of spec

Temp and humidity sensor

Wall or ceiling air pressure pickup

Kit Features:

- Color-coded onsite screen displays room conditions 24/7.
- Plug 'n' Play kits are preconfigured for your network and install virtually anywhere without IT support or building modifications.
- Battery backup and data sync ensures no data is lost if power outage or network interruption occurs.
- NIST Certified sensors and optional "SNAP" Calibration Program ensure compliance.
- Unlimited data storage and free upgrades.
- Customer Success program includes Quick-Start installation guides, user and admin online video training, and phone support.

1 Room Kit Contains:

DPS Differential Air Pressure sensor
Accuracy: +/- .25%
Range: +/- 4 in H₂O

Ambient Temperature & Humidity Sensor

Air Pressure Pick-up

Local Display

MVP 440 Digital Meter

25' cable and 8' air hose

Order the number of kits you need and match your network protocol below. If unsure, contact your IT.

Part No.	Description	Network
230004	1-room kit	WiFi
230002	1-room kit	4G/5G LTE
230003	1-room kit	900MHz
230001	3-room kit	Ethernet/cell failover

Note: The 3-room kit includes a gateway.
